**The solutions of the future powered
by a new-age cryptocurrency at its
core.**

The Mainston Cryptocurrency

STON is our decentralized, open, public, transparent, neutral, censorship-resistant, borderless cryptocurrency with a permanently fixed and limited supply that powers Mainston's leading blockchain solutions and global ecosystems.

Globalizing Empowerment

Enter the crypto world with a complete solution for all your needs.

Cryptocurrency with Stability

Secure your future with the Mainston coin developed to empower individuals through the blockchain technology.

Cryptocurrency

A stable, transparent and autonomous utility token for global adoption.

The cryptocurrency to build a better tomorrow

Unlock the power of low-cost and cross-border financial transactions.

Cryptocurrency with Stability

Secure your future with the Mainston coin developed to empower individuals through the blockchain technology.

Blockchain on Ethereum

The Mainston blockchain is based on smart contracts which permit trusted, transparent and secure transactions.

Real-Time Transactions

Blockchain smart contracts is the new financial rail that clears and settles cross-border payments in near real-time.

Proven Blockchain

By building on top of an existing and proven blockchain, we can ensure the reliability and security of the network.

Affordable Fee Structure

Our blockchain replaces costly transactions with an affordable fee structure to bring greater financial opportunity to all.

Decentralization

The Mainston philosophy for a user-centric ecosystem.

The Mainston coin will be a cryptocurrency supported by a truly decentralized, one hundred percent transparent, and global contracting blockchain that can be adapted and scaled up to handle a large variety of businesses looking to negotiate contracts for the benefit of all parties involved. All of this would get facilitated by one of the safest and most secure digital transacting environments the crypto world has ever seen.

Blockchain Technology

Trust and transparency through the blockchain.

Blockchain consists of a continuously growing list of records, grouped in “blocks”, which are connected using cryptography and together form a digital ledger. If a blockchain is used in the form of a distributed ledger, a blockchain can be managed by a peer-to-peer network collectively adhering to a protocol for Mainston validating new blocks, which, once recorded, can no longer be altered or revoked.

This consensus-based mechanism built into blockchain removes the need for intermediaries and central authorities to run the system, thereby allowing two parties who do not know or trust each other to transact with one another.

Vote for Change

Mainston's voting system allows holders of STON to have a say in the governance of their cryptocurrency and its surrounding ecosystem.

Vote For Change

One of the first community-powered ecosystems to change the future as one.

Community STON Holders Have a Voice

A governance system that empowers its community to make consensus changes.

Vote for Change

Mainston's voting system allows holders of STON to have a say in the governance of their cryptocurrency and its surrounding ecosystem.

Adaptable Coin

These systems make STON adaptable, allowing it to evolve according to the will of the STON holders, and incorporate new technology over the long run.

Rewards for Voting

STON holders who participate in Mainston's decision – making are rewarded for their efforts.

Consensus Approved

Changes within the blockchain only happen if and when 75% of the community has approved that change.

Voting Powers

Voting powers will be available to anyone who owns the Mainston coin (STON), no matter how small or big his or her stake is.

Consensus Rule Changes

A truly distributed consensus on the blockchain.

Staying true to our vision, our cryptocurrency can be adapted and can evolve through our voting system according to the will of the STON holders. Our goal is to give our community a voice to bring about real change to the future of the Mainston coin (STON) and its surrounding ecosystem through a truly distributed consensus on the blockchain.

Secure Custody Wallets

Mainston provides secure custody wallets for its global community to send and receive cryptocurrencies (such as Bitcoin, Ethereum, STON, and any other ERC-20 Tokens).

Custody Wallet Solution

Get complete control of your own Mainston crypto wallet.

Send and receive cryptocurrency worldwide

A secure and easy-to-use custody wallet solution to manage your cryptocurrency.

Secure Custody Wallets

Mainston provides secure custody wallets for its global community to send and receive cryptocurrencies (such as Bitcoin, Ethereum, STON, and any other ERC-20 Tokens).

No Setup Required

With the power of Mainston's easy-to-use Crypto solutions, you do not need to install or manage any additional software to get up and running using our services.

External Audit By Security Experts

Specialized in building secure blockchain infrastructure, U.S. based Certik has diligently audited our Ethereum-based decentralized STON cryptocurrency token smart contract, certifying the highest industry standards.

Private Keys

All private keys are generated and stored within a Hardware Security Module (HSM) certified by FIPS 140-2 (US-governmental and banking standard). Private keys in the HSM are not visible to Mainston and are non-exportable. Our security partners hold licences following financial regulations and are supervised by the German Federal Financial Supervisory Authority (BaFin).

Transparent Transaction Fees

Pay only the blockchain network fee. Mainston does not charge additional fees for making transactions via users' chosen cryptocurrency, and users have the option to decide on transaction speed.

Transaction Security

Transactions require additional confirmation from your side by utilizing a two-factor authentication (2FA) method such as a one-time code (Google Authenticator or Authy).

What We Offer

The crypto-blockchain solutions of tomorrow.

Mainston provides a spectrum of solutions with secured custody crypto wallets and a stable and decentralized cryptocurrency (STON) at its core that is governed directly by its voting community.

Send and receive cryptocurrency through our leading crypto-blockchain solutions that offer everything you need to secure your own personal wallet starting today.

A Global Movement

Leading the revolution to bring lasting change.

On a global scale, millions of people do not have access to a wide range of financial capabilities to manage or transfer funds and are locked out from society's monetary system. Our solution is simple. To give power back to the people through a complete world of decentralized and transparent global cryptocurrency solutions.
