

WAVE BEATS

TIME IS THE COIN OF YOUR LIFE STOP FIGHTING 5G. APPRECIATE NEW TECHNOLOGIE. ALL WE HAVE IS NOW !

BOOST YOUR IMMUNE SYSTEM BY FILTERING AND ENCODING THE ELECTROMAGNETIC WAVES

MATRIX OF THE LIVING

The WaveBeats Technology is based on the Activation Of Polymeric Material, which becomes by a unique process a powerful transmitter of condensed and structured energy promoting the vital potential of the cells.

The potentially disruptive artificial waves, which come into

contact with the Harmonizer, become carriers of the beneficial information continuously emitted by the Wave Beats Harmonizer.

WHY THIS RESULT

THE POLYMERIC MATERIAL

or Poly – Sources, contain in them all the DNA memory of our World since its foundation (in ref. the pharmaceutical applications of oil waste treatment). This activated data bank becomes a powerful, stable emitter.

Method of Activation

by a Conditioning Process, which lets the Quantum Matrix itself activate and inform the Polymer support by concentration, the material becomes emitter without alteration . With this Power determined by the secret of assembly.

THE SECRET

of assembly of these cleverly selected polymer components.

WE STUDIED, IN REAL-TIME...

and thanks to darkfield microscopy, the reactions of blood elements (erythrocytes – leukocytes – fibrin) subjected to **“electromagnetic stress”** – coming from the **GSM network, wifi and/or Bluetooth** – on 6 multi-origin individuals, male-female, young – elderly, live, over a period of 18 days.

Conclusion of our study :

The impact of Wavebeat harmonization on health is beyond all expectations. In addition to protecting blood plasma and its components from the impact of waves, the Wavebeat harmonizer **favors human health by restarting the entire immune system**. A pure health product !

How does this work ?

Our DNA is a database calibrated on a common repository, which must be harmoniously connected to this quantum matrix source,

which coordinates everyone in living things.

To maintain a harmonious connection with the Source Matrix, it was necessary to find the medium permanently connected with this Source, capable of capturing it, supporting it and relaying it continuously, with the right ranges of frequencies, and that in a durable way over time.

For years this approach has led us to try all the supports that have been proven in terms of quantum application.

Today with the Wave Beats technology, we have developed the process that allows us to obtain the best ratio of electromagnetic harmonization, compared to other alternatives that remain incomplete such as Silica, micro-circuit antennas, anodized aluminum... etc.

The Wave Beats Harmonizer uses the element water as a receiving messenger carrying the harmonizing quantum information.

WATER

it is surely the main communication agent, the relay, but as a transmitter it is not stable, it is above all a receiver and relay.

QUARTZ SILICA

very interesting as a storage medium, its spectrum is limited in amplitude and ends up showing levels of saturation and external pollution which ends up corrupting it.

ALUMINUM

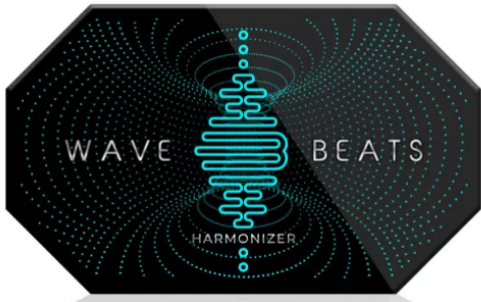

Powerful in terms of information relay, its reception amplitude spectrum is however limited and ends up saturating like quartz, with a surface treatment we manage to limit this drawback, on the other hand its metallic and oscillatory nature not suitable for everyone and at all times, especially at night.
